SUBJECT INDEX VOLUME 14 (1990)

albumin, 215
albumin microspheres, 111
albumin microcapsules, 111
antibacterial drugs, 79
artifical muscle, 253

biodegradation, 111
bioerodible polymers, 21
biological activity, 61

carrier-mediated transport, 43
chemical crosslinking, 111
chemomechanical system, 253
clinical performance results, 233
concentration dependent diffusion, 153
concentration profile, 169
constricted pore geometry, 153
controlled release of pentazocine, 53
controlled release membrane, 11
controlled release of naltrexone pamoate, 21
cotinine, 145
crosslinking, 11
curing kinetics, 11

denaturation, 79
dextromethorphan and diphenhydramine, 243
diffusion coefficient, 169
dissolution rate, 1
divisible dose matrix tablets, 179
drug release, 111
drug release modeling, 153
dry delivery system, 253

enzymatically controlled release, 263
equivalent whole and half-tablet release rates, 179
ethylcellulose, 203

film-coating, 203
5-fluorouracil, 43

Higuchi model, 215
hydration, 133
hydrogels, 133
hydroxypropyl methylcellulose, 1
hydroxypropyl content, 1

in vitro release, 221
individual kinetics, 215
insulin, 253

lateral scores, 179
lecithins, 243
lipid composition, 71
liposomes, 71
luteinizing hormone releasing hormone, 133, 233
luteinizing hormone releasing hormone analog, 221

macromolecules, 263
macroporous implant, 221
magnetite incorporation, 111
mechanism and rate of skin permeation, 29
mechanism of release, 203
melting method, 269
metaproterenol, 71
microencapsulated liposomes, 263
microparticles, 269
microspheres, 79, 215
minimum increase in new surface area, 179
multi-core capsules, 111
multiple emulsions, 53

nafaralin, 133
naproxen, 1
narcotic addiction, 21
nicotine, 145

osmotically driven release, 203
oxymorphone, 243

particle size control, 111
penetrant hydrophilicity, 29
percolation theory, 221
pharmacokinetics, 145
phospholipase, 263
poly(hydroxyalkyl methacrylate), 133
D,L-polylactic acid, 269
poly(ortho ester)s, 21
polyelectrolyte gel, 253
polymer–metal complexes, 61
population kinetics, 215
pressure sensitive adhesives, 29
prodrugs, 43
prolonged release, 53
pseudolatex coating, 203

random pore topology, 153
rectal absorption, 43
release kinetics, 71, 169
retarded diffusion, 153

shelf-life, 263
silicic acid gel, 169
silicone elastomer structure, 29
silicone membrane, 11
silicone elastomer implant, 221, 233
site targeted delivery, 43
skin permeation enhancers, 243
skin permeation of procaterol, 243
stability, 61
structure, 61
sustained release matrix tablets, 1
sustained release kinetics, 79
sustained release pattern, 215
sustained release, 179, 269

testosterone, 169
thermal crosslinking, 111
transdermal drug delivery, 29, 145, 243
transverse scores, 179

vinpocetine, 269
vinyl pyrrolidone copolymers, 61

water–oil–water emulsions, 53
